THIS IS UNEVALUATED. ADVANCE INFORMATION

CONFIDENTIAL

CONFIDENTIAL 25X1 MISCELLANEOUS HIGHWAY AND RAILROAD INFORMATION IN HUNGARY HIGHWAYS 25X1 the highways mentioned below were six meters wide, of concrete construction, with drainage ditches one to 1.2 meters wide on each side. These roads were built on clay soil. Traffic of all types was heavy on these roads. 25X1 1. BUDAPEST-VIENNA Highway1. This highway passed through the towns of DOROG (N47-43,E18-44), KOMAROM (N47-45, E18-06), GYOR (N47-41, E17-38) and MOSONMAGYAROVAR (N47-52, E17-17). a first class highway and part of the international 25X1 highway network. The terrain was generally level along it. It had gravelled shoulders and several sharp curves. It was repaired in several places in the apring of 1956. 25X1 2. BUDAPEST-KECSKEMÉT (NA6-54.E19-41) Highway This highway passed through the towns of ALSONEMEDI (N47-18,E19-10), SARI (N47-12,E19-16), ORKENY (N47-07,E19-26), TABORFALVA (no coordinates listed) and LAJOSMIZSE (N47-01, E19-32). The terrain was fairly level throughout. This highway had no sharp curves. It had shoulders of earth overgrown with grass and were one-half meter to one meter wide. 25X1 3. BUDAPEST-NAGYKANIZSA (N46-27,E16-59) Main Highway This highway connected the following towns with BUDAPEST: SZEKESFEHERVAR (N47-12,E18-25), POLGARDI (N47-03,E18-17), SIOFOK (N46-54,E18-03), KOROSHEGY (N45-49, E17-54) BALATONBOGLAR (46-46,E17-40) and NAGYKANIZSA. This highway, one of the two main highways connecting the capital with the Balaton resort area, had dirt shoulders approximately one-half meter wide. The terrain along it was grassy and hilly. There were several bridges on this highway, most of them over small brooks and several sharp curves. A very dangerous curve was located near a forest called Kamaraerdö, between BUDAÖRS (N47-27,E18-58) and NAGYTETENY (coordinates not listed). B. RAILROADS The three railroad lines described below had two sets of standard guage tracks and standard signal systems. He estimated that there were 10 to 12 cars

CONFIDENTIAL

This line connecting GÖDÖLLÖ (N47-36,E19-21), HATVAN (N47-40,E19-41).

FUZESABONY (N47-45, E20-25) and MISKOLC with BUDAPEST, was not electrified Only steam enginess operated on it. Two of the most common

types observed were the 4.24 and the 4.11 heavy steam engines. Other engines,

1. BUDAFEST-MISKOLC (N48-06.E20-47) Railroad Line

the proficiency of working personnel seemed high.
